

**AMENDMENTS TO THE SPECIFICATION:**

Please replace the paragraph beginning on page 15, line 33 with the following amended paragraph:

The receiving apparatus 42 corresponds to the receiving apparatus 200 shown in FIG. 2A [[1]], for example, and receives the transmitted light-modulated wave and executes the demodulating process to obtain the original data of the contents. The original data is displayed on the monitor 40. According to the above embodiment, the contents including image data can be transmitted because the high-speed data transmission is possible by utilizing the multi-value modulating system, such as the 64 QAM, as the modulating-demodulating system.
